PROFESSIONAL SUMMARY

Java Full Stack Developer with 4+ years of experience designing, developing, and maintaining enterprise applications in the Banking and Financial Services (BFSI) domain. Skilled in Core Java, Spring Boot, Microservices, RESTful API development, Oracle SQL, and BPMN workflow automation, with proven ability to build scalable backend solutions and optimize database operations. Hands-on experience building responsive, component-based user interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3, including React Hooks, React Router, and Axios for frontend-backend integration. Follows clean code practices and actively participates in peer code reviews to ensure code quality, with working exposure to CI/CD pipelines using Jenkins. Strong background in Digital Lending and Loan Origination Systems (LOS), API integration, and cross-functional collaboration to deliver high-quality software on schedule.

CORE SKILLS

Programming Languages: Core Java, JavaScript (ES6+), SQL, HTML5, CSS3

Backend & Frameworks: Spring Boot, Microservices, RESTful API Development, JDBC, BPMN Workflow Automation, OmniApp

Frontend: React.js, React Hooks, React Router, Axios, Single Page Applications (SPA), Responsive Web Design

Databases: Oracle SQL, Microsoft SQL Server (MSSQL), PostgreSQL

Tools & Platforms: Swagger, Postman, JBoss, Jenkins CI/CD, Eclipse, NetBeans, Git, GitHub, SVN

Methodologies & Domain: Agile/Scrum, Digital Lending, Loan Origination Systems (LOS), BFSI

Core Competencies: Code Review Participation, Writing Clean & Maintainable Code, Root Cause Analysis (RCA), Stakeholder Communication, Problem Solving, Time Management

WORK EXPERIENCE

Senior Software Engineer — Newgen Software Technologies Ltd

April 2022 – August 2026

Java Backend & BFSI Application Development

- Developed and maintained Java applications using OmniApp within the BFSI domain, supporting enterprise loan processing systems.
- Designed and configured BPMN workflows and business process automation to streamline loan processing operations.
- Actively participated in peer code reviews, providing and incorporating feedback to maintain code quality and adherence to standards.
- Wrote clean, well-structured, and maintainable Java code following best practices to support long-term readability and ease of enhancement.
- Gained working exposure to CI/CD pipelines using Jenkins to support automated build and deployment processes.
- Implemented and consumed SOAP and RESTful APIs to enable secure, reliable system-to-system communication.
- Performed Oracle SQL operations including data handling, bulk insertion, updates, and deletion of master data records.
- Coordinated with cross-functional Business, QA, and Operations teams to gather requirements and deliver software modules on schedule.

React.js Frontend Development

- Built responsive, reusable UI components using React.js, JavaScript (ES6+), HTML5, and CSS3.
- Developed Single Page Applications (SPA) using React Functional Components and React Hooks.
- Integrated Spring Boot REST APIs with Axios to enable seamless frontend-backend communication.
- Implemented CRUD operations, dynamic rendering, search, filtering, and sorting functionality.

- Developed client-side routing with React Router to enable smooth navigation across application pages.
- Managed application state using React Hooks and optimized component re-rendering for improved performance.
- Used Git and GitHub for source code management and version control across development teams.

PROJECTS

Digital Lending – Loan Origination System (LOS)

Collaborated with multiple banking clients to implement and enhance their Loan Origination System (LOS), streamlining end-to-end customer loan processes. Worked extensively on ALOS (Kisan Credit Card loans), CLOS (MSME loans), and RLOS (vehicle loans), contributing to system development and workflow automation from application through disbursement.

- Designed and implemented digital loan onboarding and workflow automation to streamline end-to-end loan processing.
- Integrated REST-based APIs using Spring Boot to fetch customer profile, credit information, and CIBIL score data.
- Performed Oracle SQL operations for bulk data management, including insertion, deletion, and updates of master records.
- Designed and configured BPMN workflows to build complete loan processing journeys aligned to client-specific business rules.
- Implemented frontend validations using JavaScript and Java within the OmniApp platform to ensure data accuracy and compliance.
- Improved system efficiency by automating eligibility checks, document validation, and application routing.
- Supported basic Jenkins CI/CD setup for automated builds across development and testing environments.
- Collaborated with cross-functional teams to analyze requirements, resolve defects, and optimize process flow for faster loan disbursal.
- Ensured secure, reliable system communication through proper API error handling, exception management, and response mapping.
- Supported production deployments, troubleshooting, and performance tuning of applications.

E-Commerce Application — React.js, Spring Boot

GitHub Repository: github.com/Harris302000/ProjectRepo

- Developed a full-stack e-commerce application using React.js, Spring Boot, and relational database integration.
- Implemented user login, sign-up, product listing, search, sorting, shopping cart, and REST API integration using Axios.

Task Management Application — React Hooks

GitHub Repository: github.com/Harris302000/ProjectRepo

- Built a task management application using React Hooks, including add, update, delete, and status management features.

RECOGNITION & ACHIEVEMENTS

- Received client appreciation for successful project delivery, consistent quality of work, and timely go-live of key modules.
- Awarded the Pinnacle Award and HiFi Award by management for outstanding performance, dedication, and contribution to project success.

EDUCATION

Bachelor of Engineering (B.E.) – Electrical and Electronics Engineering

St. Joseph's College of Engineering, Chennai | 2018 – 2022
